PROJECTS

GOLD RUSH GAME

Assembly Class Project | Nov 2019 — Dec 2019

- this was a final project for my Introduction to Computer Architecture course
- used assembly language inside terminal bash & a series of register calls, syscalls, loop statements, and labels; game runs according to user's inputs; main goal is for the player to last as long as 20 weeks with the greatest income possible.

WHAT THE TRELL

LearnTech Labs | Oct 2015 — Nov 2015

- my first individual project of a simple clone of trello.com where users can make an account and edit/delete boards/lists/items.
- used MEAN(MongoDB, ExpressJS, AngularJS,NodeJS) stack.
